From fashion to beloved pets to portraiture these collages magnificently exude character and wit. [English artist Peter Clark](#) creates three dimensional images out of his collection of old stamps, maps, buttons, love letters, sewing patterns, playing cards, and more. Peter first draws the outline, then carefully chooses from his collection of found 'things' to find the right texture and colors to 'paint' his collages. A. Borloz had it right when he referred to Clark as "A true paper collage genius."
